

Practical-6 Hive / Hive server2

```
from pyhive import hive
import pandas as pd
```

```
# connect to hive
```

```
conn = hive.Connection(host="localhost",
                        port=10000, username="hive")
```

```
cursor = conn.cursor()
```

```
# Create DB
```

```
cursor.execute("CREATE DATABASE IF NOT
                EXISTS test-db")
```

```
# Use DB
```

```
cursor.execute("USE test-db")
```

```
# Create table
```

```
cursor.execute("""
                CREATE TABLE IF NOT EXISTS employee
                (
                    id INT,
                    name string,
                    salary INT
                )
            """)
```

ROW FORMAT DELIMITED
FIELDS TERMINATED BY ','

" " ")

Create function

cursor.execute("CREATE FUNCTION my_viper AS
'org.apache.hadoop.hive.q1.udf.UDF'")

Create Index

cursor.execute(" " " "

CREATE INDEX emp-index
ON TABLE employees (department)
AS 'COMPACT'
WITH DEFERRED REBUILD

" " ")

close connection

cursor.close()
conn.close()
